LED blinking in Raspberry Pi using Python

```
import RPi.GPIO as GPIO.      # Import Raspberry Pi GPIO library
from time import sleep       # Import the sleep function from the
time                          module
GPIO.setwarnings(False)      # Ignore warning for now
GPIO.setmode(GPIO.BOARD)    # Use physical pin
numbering
GPIO.setup(8, GPIO.OUT, initial=GPIO.LOW)  # Set pin 8 to be an
output pin
                                   and set initial value to low
                                   (off)
```

Traffic Light blinking in Raspberry Pi using Python

```
from gpiozero import
LED red = LED(22)
amber =
LED(27) green
= LED(17)
```

red.blink(1, 1)

amber.blink(2, 2)

green.blink(3, 3)
